SERVICE PROVIDED

On-Site Safety Advisors

OVERVIEW

HazTek is a safety partner for a successful design and construction service provider in the life science industry. We provide safety services on various construction projects, supplementing their in-house safety staff and enhancing their overall safety culture as they meet the needs and expectations of their clients.

HazTek provides on-site Safety Advisors for various of this company's construction projects, including their work on new build sites and renovation projects at pharmaceutical construction projects in Pennsylvania and Delaware. The design and construction service provider's growing volume of construction project work has required more support for their small, in-house safety team. Since our team has experience working at certain project locations and knowledge about their changing safety rules and regulations, our team is a vital component on these project sites.

HazTek has been working with this client for over eleven years, with no gaps in service. Our safety professionals' expertise, care, and passion for everyone's wellbeing has made us an integral part of their safety culture.

UNIQUE HIGHLIGHTS

In addition to providing on-site Safety Advisors, HazTek also partners with this company to enhance their overall safety culture by engaging in safety stand-downs, safety talks, and safety events — including a Breakfast and Learn event in June of 2022.

Our sales team works closely with the company's internal safety and management teams to promote safety in a positive way.
